Dear Hiring Team,

I am excited to apply for the position of ML/AI Engineer. I am an AI enthusiast and educator with hands-on experience building AI-powered applications, including Python/Flask platforms, RAG-based systems, and interactive educational tools.

I have designed and deployed projects that teach AI concepts through structured lessons and hands-on experiences, while also developing production-ready AI solutions that leverage NLP, embeddings, and prompt engineering. My work bridges the gap between cutting-edge AI technology and practical, user-friendly applications.

I am eager to bring my technical expertise and instructional skills to [Company Name] to help build innovative AI solutions and deliver impactful experiences.

Thank you for your time and consideration. I would welcome the opportunity to discuss how I can contribute to your team.

Sincerely,

Adepoju Yusuf
